Subject index

A

Acetazolamide 138
Acetylcholine 280, 343, 454, 521
– receptor 555
– release 540
Acidification 142
Acidosis 492
Aconitine 381
Action potential 214, 569, 462
Acylcholine 280
Adenine nucleotides 169
Adenylate cyclase 296
Adenyl cyclase 74
ADH 81
Adrenalectomy 296
Adrenaline 427
α_1-Adrenergic agonists 416
β-Adrenoceptor stimulation 427
β-Agonists 7
Aequorin 427, 448
Afferent discharge 208
Aldosterone 194
Alkalinization 93
Amiloride 138, 616
– analogues 200
– -sensitive sodium transport 194
– sensitive transepithelial Li transport 188
2-(2-Aminoethyl)-pyridine sodium pump 308
4-Amino ethyl benzoate (benzocaine) 589
4-Aminopropiophenone 589
4-Aminopyridine 533, 561
– (4AP) 374
– sensitive outward current 561
Ammoniumchloride 93
AMP 114
Amphotericin B 74
Aniline 589
Anion carrier 60
Anion permeability 258
Antidiuresis 411
Antidiuretic hormone 486
Antifertility property, gossypol 638
Antisecretory factor 328
Asphyxia 169
ATP 582, 607
– -activated channel 644
– -activated macroscopic current 644
– -dependent K^+ current 582
Atrium 454
Avian osmoregulation 422

B

Ba^{2+} 289
Bacterially infected rabbits 635
Barium 81
Basolateral membrane(s) 107, 200
Benzene 589
Benzocaine 265, 589, 596
Benzoyl compounds 547
Benzyl alcohol 589
Bile acids 601
Bladder, urinary 486
Blood-free brain perfusion 152
Blood pressure 1
Body temperature 569
–– thresholds 175
Bombesin 318
Botulinum toxin 533
Brain 152
– perfusion 152
Brown adipose tissue 314
Brush border membrane 333

C

Ca^{2+} 107
Ca^{2+} carrier ETH 129 223
Ca^{2+}-channels 7
Ca^{2+} current 561, 582
Ca^{2+}-dialysis 394
Ca^{2+} loading 374
Ca^{2+} microelectrode 223
Ca^{2+}-mobilizing agonists 416
Ca^{2+}-movements 374
Ca channels 52
– currents 52
– -inactivation 52
– metabolization 512
– permeability 499
– transients 427
Caffeine 468
Calcium 208
– antagonists 217
– channel block 217
– current 214, 361, 578
– dependence 607
– indicators 448
– internal, pituitary 620
– -stimulated outward current 208
Calorimetry 163
Capsaicin 403
Cardiac cell pairs 394
– cells 582
– contractile function 169
– muscle 427
– ventricular cells 641
Cardiomyocytes 158
Castration 528
Catecholamines 158
Cation channel 607
Cell culture 578
– electrolyte concentrations 477
– fusion 289
– hyperpolarization 114
– membrane potential 289, 499
– size 24
Cellular osmoregulation 411
Centruroides sculpturatus toxins 381
Cerebellum 24
Channel, cation 607
– conformation 265
Charge movement 217
Chemical driving force 477
Chloramine-T 251, 265
Chloride 258, 477
– channel(s) 114, 122, 620
– current 512
– transport 74, 280, 616
Chloroquine 93
Cholera toxin 328, 601
Chronic stimulation muscle 67
Clearance studies 492
Cl^-/Cl^- exchanger 142
Cl^- permeability 280
Cl^--sensitive microelectrode 280
Clostridial neurotoxins 533
Co^{2+} 468
Cold-defence 175
– fibre activity 208
– -induced thermogenesis 314
– receptor activity 208
– receptors 274
– -responsiveness 236
Collecting duct 138
– tubule(s) 81, 296
Colon 194
Conductance channel 114
Connecting tubule 126
Contractile rat myoballs 462
Contractility 163
Controlled atmosphere 632
Cooling, effect on bacterially infected rabbits 635
Coronary artery reactivity 308
Cotransport 132
– with Na^+ ions 229
Cs^+ 107
Cultured cell electrophysiology 632
– sensory neurons 52
Current fluctuations 512
– -voltage relation 462
Cutaneous vasomotor tone 318
Cyanide 448
Cyclic AMP 158, 427, 486, 512,
– GMP 521
Cytochrome aa_3 152
cAMP 7

D

Decamethonium 374
Decerebrate cats 24
Deiters neurons 13
Denervation 540
Depolarization 258
Desoxycorticosterone 81
Development 194
Devital teeth 274
Diameter of vascular segments 302
3,4-Diaminopyridine 403
Diaphragm 540
Dibutyryl-cyclic AMP 427
Dibutyryl cyclic AMP 74
Dicarboxylate transport 547
DIDS 60, 280
Dietary intake of $KHCO_3$ 126
Diet-induced thermogenesis 314
Dihydroouabain 323
Dihydropyridine 361
Diltiazem 217
Diluting segment 289
Diphenylamine-2-carboxylate 114
Diuresis 411

Diuretics 60
Dogfish 100, 114, 122
Dorsal root ganglion neurones 403
– – – neurons 361
Dysprosium triethylenetetramine-N,N,N',N'',N''',N'''-hexaacetic acid [Dy(TTHA)] 343

E

EIPA 200
Electrical stimulation 367
– uncoupling 394
Electrolytic lesions 175
Electron microprobe analysis 477
Electrophysiology 138
Embryonic muscle 468
Enterotoxin 328
Epicardial receptors 145
Epithelia 323
Epithelium 200, 244
Ethyl benzoate 589
Excitable tissue 47
Excitation-concentration coupling 468
Exercise training 349
Exocrine glands 499
Exocytosis 93
External Ca ions 499
Extracellular chloride concentration 142
– fluid 422
– sodium 163

F

Feline cold receptor activity 208
Femoral arteries 302
Ferret 448
Fever 635
Fibre composition 349
– transformation 349
Fluid balance 422
Fluorescence microscopy 47
Force-stiffness relation 39
Forskolin 158
– action 486
Frog atrium 454
– skin 323
– skin epithelium 200
Fura 2 47
Furosemide 60, 74, 194, 280

G

$GABA_A$ receptors 620
GABA-evoked chloride channels 620
Gas-flow chamber 632
Gating current 381
– currents 251
Giant axon 589, 596
Glomerular filtration rate 296
Glomeruli 93
Glucose 158
Glycerophosphorylcholine 411
GMP-induced currents 521
Gossypol 638
G-proteins 7
Growth cones 578
GTP-analog 7
– -binding proteins 499

H

HCO_3^-/Cl^- exchanger 142
HCO_3^- concentration 132
Heart 158
– cell culture 632
– cells 454
– muscle energetics 163
– production 163
– tissue 169
Heat defence 175
Heterogeneity 138
Hexamethonium 145
Hexose transport in cardiomyocytes 158
5-HT reuptake 507
Human muscle fibres 349
5-Hydroxytryptamine 145
Hypercapnia 1
Hyperpolarization 258, 454
Hypothalamic thermoresponsive neurons 236
Hypoxia 1, 448
Hysteresis diagrams 438

I

Infection 635
Innervation, multiple 468
Inositol 1,4,5-triphosphate 416
Inositoltrisphosphate 499
Input resistance 540
Instrumentation 47
Insulin 158
Insulinoma cell line 607
Insulin-secreting cell line 607
Intercalated cell 138
Intestinal P_i transport 333
– secretagogues 601
– secretion 601
Intracellular Ca transients 427
– Cl^- activity 280
– calcium 448
– calcium (or pCa_i) 394
– coupling 394
– Na 343
Intracellular pH 60, 93, 132, 142, 289
Intracellular pH regulation 200
– recording 632
Inulin 422
– space 422
Inward rectification 454
Ion flux studies 60
– transport 328
Ion sensitive microelectrodes 142
– – probe 47
Ionic channels 337
IP_3 416
Isobutylmethylxanthine (IBMX) 521
Isolated perfused liver and kidney 220
– – rat kidney 220
– – perfused rectal gland 114
– skin 616
– superfused rat glomeruli 93
– toad skin 188
Isometric tension 448
Isoproterenol 427

J

Jejunal pH 601
– secretion 328
Junction potentials 528

K

Kidney 289
–, Cl channel 122
– collecting duct 81, 138
– distal nephron 126
– K channels 107
– prolactin effect 182
– transport dependent QO_2 74
– hypertrophy 296
– slices 229
K^+ channel blockers 374
K^+-channels 374
K^+ conductance 374
K^+ conductances 81
K^+ conductive pathway 100
K^+ current 454, 462, 561, 582
K^+ secretion 81

L

Lacrimal gland acinar cell membranes 280
Lactate 229
Length-force curve 438
Length of vascular segments 302
Lidocaine 107
Lithium 188
Local anaesthesia 589, 596
Loop of Henle 74
Lumbosacral cord 13
Luminal membrane 122

M

Macular vestibular input 13
Magnesium excretion 492
Mandibular gland 343
Medullary ascending limb 74
– collecting duct 138
Membrane conductance 521
– currents 214, 403, 582
– depolarization 607
– patches 337
– potential 60, 132, 540
– reactivity 528
– vesicles 333
Menthol 52
Metabolic acidosis 492
– rate 318
Methylamine 93
Methyl benzoate 589
Mg-ATPase 126
Microelectrode 223
Microflow superfusion system 337
Micropuncture 477, 492
Miniature endplate current 555
– – potential 540
– – end plate potentials 258
Mitochondria 169
Molluscan neurons 578
Monensin 93
Morphine microinjection 367
Motor nerve terminals 258, 533
Mucin secretion 416
Mucosal permeability 601
Muscarinic agonists 416
– H-response 521
– responses 512
Muscle contraction 39
– culture 462
– dimensions 438
Muscle fibers 217, 349, 468
– mechanical properties 438
Muscles, extraocular 507
Muscular dysgenesis mutation 468

Myelinated nerve fibre 251, 265, 381
Myoballs 462
Myocardium 142
Myocyte 158
Myosin ATPase microphotometry 67
– expression nonuniform 67
– isoform subunits 349
– light and heavy chains 67

N

Na-Ca exchange 163
Na current 251, 569
Na flux 323
Na influx 343
Na^+-conductance 81
Na^+ current, myoballs 462
Na^+ efflux 200
Na^+ (HCO_3^-) cotransport 132
Na^+/H^+ exchanger 200, 289
Na^+ permeability 200
Na^+ reabsorption 81
^{23}Na NMR 343
N,N-dimethyl-5-methoxytryptamine 507
Na-K-ATPase 126, 182, 296
Na-K-Cl cotransport 60
Na-K pump 163
Naloxone 367
Na-transport 188
Neck input 13, 24
– rotation 24
Nephron 182
– Na-K-ATPase 126
– segment 74
Nerve 569
– fibres 569
– peptide 328
– terminals 258
Neuromuscular junction 533, 540, 555
Neuronal calcium current 361
Neurons 52, 578
Neurotoxins 533
Nicotine 145
Nifedipine 361
Nigericin 93
Nitrate 229
Nitrendipine 217
5-Nitro-2-(3-phenylpropylamino)-benzoate 114
Node of Ranvier 569
Nodes of Ranvier 251, 265, 381
Nonlinear multicomponent analysis 152
Noradrenaline isoprenaline 7
Nucleus parabrachialis 367
– raphe magnus lesion 175

O

OH^-/H^+ permeation 132
Olfaction 244
Olfactory marker protein 244
– receptor neurons 244
Ontogeny 194
Oocytes 512, 521
Opioid system 367
Optical reflection spectra 152
Organic osmolytes 411
Osmolarity 308
Osmolytes 411
Osmoregulation 411, 422
12-O-tetradecanoylphorbol-13-acetate (TPA) 416
Ouabain 81, 188, 200, 323, 343, 374
Overshoot 462
Oxidative phosphorylation 448
2-Oxoglutarate 229

P

PAH transport 229
– transporter 547
Papillary muscles 448
Para-aminohippurate transport 229, 547
Pasteurella multocida 635
Patch clamp 7, 52, 107, 114, 122, 244, 361, 462, 578, 620, 607
– – technique 454
Pathway clamp analysis 100
Peptidergic agonists 416
Perfused rat mandibular gland 343
Phasic phrenic response 367
Phenamil 200
Phenoxybenzamine 145
Phenoxy compounds 547
Phentolamine 145
Phorbol esters 512
Phosphate diet, low 333
Phosphoinositide 416
Phrenic nerve discharges 367
P_i transport, renal-intestinal 333
Pituitary cells 620
– intermediate lobe cells 620
Polypeptide hormones 74
Poly(vinyl chloride) 223
Post-denervation changes 540
Postnatal development 194
Postsynaptic channels 468
Potassium 477
– adaptation 477
– bicarbonate 126
– channels 100, 107, 265, 521
– current 403, 454, 512
– fluxes 163
Pregnancy 314
Preoptic area 1
Pressure diameter relation 302
Pressure-length relation 302
Principal cell 138
Procaine 374
Prolactin 182
Propiophenone 589
Propranolol 145
Proximal tubule of rat kidney 229, 547
Pulmonary artery 561
Pulpal receptors 274
Purinergic neurotransmission 644
Pyruvate 229
pH 93

Q

Quinidine 107

R

Rabbit kidney 74
Raphe nuclei in guinea-pig 175
Rb^+ 107
Receptor neuron 244
Receptor-operated Ca^{2+}-channels 7
Rectal gland 100, 107, 114, 122,
Redox state of cytochromes 152
Reflection photometry 152
Relaxation 39
Renal and intestinal P_i transport 333
Renal Na-K-ATPase 182
– papilla 411
– proximal tubule 132
– sympathetic nerve activity 145
– tubular cells 477
– tubules, Mg 492
Renin release 93
Reoxygenation 448
Repetitive electrical stimulation 367
Respiratory depression 367
– frequency 1
– rate 318
Response characteristics 13
Resting membrane potential 540
Reversed SCC 616
Rostral pons 367
Run-down 582
Ryanodine 427

S

Salivary gland 343
Salt adaptation 422, 616
– balance 422
Sarcoplasmic reticulum membranes 374
Scorpion toxins 381
Second messengers 521
Secretion of mucin 416
Secretory granules 93
Sensory neurons 52
– processes 208
Serotonin 507
Short-circuit current 194, 616
Single cells (frog atrium) 454
– cell voltage clamp 561
– channel recording 337, 641
– heart cells 454
– nephron segment 182
– smooth muscle cells 561
Sinusoidal stretching 438
SITS 138
Skeletal muscle 67, 349, 374
– – fibres 468
Skinned muscle fibres 374
"Small" chloride channel 122
Smooth muscle 7, 60, 302, 528
– – cells 561, 644
Sodium 163, 477
–, potassium exchange pump 323
– -bicarbonate cotransport 132
– channels 265
– current 403, 589
– – inhibition 596
– pump 308, 323
– space 422
– transport 194
Solute transport 601
Spinal cord 13
Spironolactone 194
Spontaneous junction potential 528
Squid giant axon 251, 589, 596
Stiffness of frog muscle fibres 39
Stilbene derivative SITS 132
Streptozotocin-induced diabetes 296
Strophanthidin 394
Submandibular gland 416
Substance P 416
– P release 361

Sucrose 308
Sulfate transport 547
Sulfhydryl reagents 555
Superfused rat glomeruli 93
Sympathetic nerve activity 145
Synaptic blockade 236

T

Taurodeoxycholate 601
TEA 265, 607
Teeth 274
Temperature dependence 569
– regulation 175, 318, 635
Tension 39
– development 163
Tetani 39
Tetanus toxin 533
Tetraethylammonium 107
– (TEA) 374
Tetrodotoxin 578
– (TTX) 403
Thermogenesis 314
Thermoneutral zone 314
Thermoperception 274
Thermoregulation 1, 318
–, avian-mammalian 236
Thermoresponsive neurons 236
Thermosensitive neuron 1
Thermostimulation 274
Thyroid hormones 214
Thyrotropin-releasing hormone (TRH) 318
Tibialis anterior muscles 67
Toad Bufo arenarum 616
– bladder 638
– skin 188, 616
Tolbutamide 582
Training 349
Transepithelial hydrogen ion secretion 289
– resistance 81
Transient outward 641
Transmembrane action potential 214
Transmitter release 258, 302, 361, 468, 533
Triton X-100 601
Tropinin isoforms 349
TTX 468, 607
T-tubule system 468
Tubule Na-K-ATPase 296

U

Urea permeability 638
Urinary bladder 486
– magnesium excretion 492

V

Vagal nerve endings 145
Valproate 547
Vascular segments, stretch 302
– smooth muscle 7, 60, 302
Vas deferens 528, 644
Vaseline gap voltage clamp 217
Vasopressin 81, 182, 638
Venous blood stream cooling 635
Ventricular cells 641
– muscle 427, 448
– myocardium 142
– myocytes 214
Vestibular input 24
Vestibulo-ocular reflex 507
Vestibulospinal neurons 13, 24
Virgin rats 314
Voltage clamp 217, 251, 265, 381, 561

W

Water-flow-regulation 486
Water permeability 638
– transport 486
Whole-cell patch-clamp 462

X

Xenopus oocytes 512, 521
